

Alesta® TEX

Alesta® TEX is a service offered by Axalta to propose on demand, products with leatherette appearance in a short time in a large choice of colours.

All the RAL colours, in polyester industry chemistry, in high gloss finished are available in 20 kg cartonbox within a short time.

The leatherette finish brings a lot of advantages:

It make it possible to hide the substrate defects (welding points...).

The surface hardness is very high and then we get very good mechanical resistance (resistance to scratch and abrasion).

The handling of the powder coating is easy (handling, stockage, manufacturing...).

Innovation:

The new Alesta® TEX generation is easy to use on the coating lines. It is compatible with the other powder used without contamination of the working place.

Market segments:

Metallic furniture, office furniture, urban and garden furniture

Electrical equipment: cupboard, electrical box

General industry: tool machines...

Highlights:

- Leatherette appearance
- A wide choice of colours
- Very good resistance to scratch
- Hides substrate imperfections
- Can be used for indoor and outdoor purposes
